

EnergyMizer™

Guaranteed Energy Reduction Program

What Is The EnergyMizer™?

The EnergyMizer™ is an advanced power reduction system that will save you 10% to 20% on electric bills each and every month. Since 2007, our systems have been installed in all types of business customers resulting in hundreds of satisfied users. Our flagship 8% money-back savings guarantee and unique business model have made us a leader in our field.

How Does It Work?

The EnergyMizer™ uses a state of the art technology to actively monitor and improve the power usage in your business. Our energy reduction system corrects spikes in the electricity you pay for and creates a uniform leveled power draw, thereby avoiding the constant surges that occur when your equipment is powered on. In simple words, electricity is stored, flattened and released as needed. The diagram below simply illustrates the energy saving process.

Energy Facts!

“Up to 25% of billable electricity consumed in business is non-productive and unusable.”

U.S. Department of Energy

“The country is experiencing an energy crisis characterized by rapid and drastic price increases as well as threatened shortages.”

House Small Business Committee
U.S. Congress

Incoming Electricity

Although incoming power spikes are wasted, they are still paid for by the energy consumer. The EnergyMizer™ stores, flattens and releases these power surges, resulting in an efficient use of energy and savings of 10%-20%.

Billable but not entirely usable electricity

Billable and entirely usable electricity

EnergyMizer™
Dynamic Capacitance Module

The 5 Key Functions Of The EnergyMizer™

- 1) Magnetic phase balancing of voltage to reduce demand, noise and waste in loads;
- 2) Harmonic filtering of non-power currents to reduce the billed Kilowatt Hour demand;
- 3) Transient voltage conversion by capturing surges and redistributing as usable power;
- 4) Resonance-free power factor correction to reduce reactive non-power demand;
- 5) Reduced electromagnetic fields from regenerated non-power currents as usable power.

The EMS Business Model

We realize that every business is different and that each company has unique needs and circumstances. To provide your business with the solution that best fits its requirements, we offer distinct **Purchase**, **Lease** and **Rent** programs for optimal energy cost savings with the EnergyMizer™.

PURCHASE/LEASE PROGRAM HIGHLIGHTS

- Free power consumption analysis
- 15-24 Month return on investment
- 8% Guaranteed KWH usage reduction
- 6 Year system replacement warranty
- Increased equipment life
- Annual savings summaries

RENTAL PROGRAM HIGHLIGHTS

- Free power consumption analysis
- Immediate positive cash flow
- 8% Guaranteed KWH usage reduction
- Lifetime system replacement warranty
- Increased equipment life
- Annual savings summaries

Customer Testimonials

"My electric bills in the restaurant have been rising steadily over the past couple of years. I did not know a product like this existed. Since installing the EnergyMizer™, my electric bills have gone down by 10% on average, with some months reaching up to 17% savings! Energy Management Systems was right, going green has never been easier. And the best part is, I'm saving money!"

Matt Pikar
Afghan Grill Restaurant, Dallas, TX

"I was skeptical at first, but how wrong was I! I installed the EnergyMizer™ and immediately started saving money. This product works!"

Terrence Sloane
The Sloane Agency, Harrison, NY
